 Webstory

The technological solution

Develop information systems based on the historical behavior of the NDVI and on climatic and forecast variables for farms in different regions and production systems, implementing management strategies that optimize the use of information in economic, social and environmental terms.

Description

A web page was created with the historical information of the NDVI and climatic variables, available at:
<https://www.agro.uba.ar/users/lart/fontagro/>

Results

- A web site.
- Land use maps of the entire region for the last 5 campaigns.
- Training for technicians and producers.
- Satellite and climatic information of the intervention area.
